

# Olympus Pen E-PL7 Back Case Replacement

This guide will show you how to replace the back case of the Olympus Pen E-PL7.

Written By: Kelsea Weber

## INTRODUCTION

Use this guide to replace a damaged back case, or open the case to access other components of your camera.

We highly suggest you use a [magnetic project mat](#) or an [organization tray](#). This camera has **many** different types of screws and keeping them organized is key to proper reassembly.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Magnetic Project Mat](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Back Case

- Use a Phillips #00 screwdriver to remove the six 2 mm screws on the bottom of the camera.

## Step 2

- Remove the two 4 mm **reverse threaded** Phillips screws from the bottom of the camera.
- ⓘ Reverse threaded screws tighten counter clockwise and loosen clockwise.

### Step 3

- Remove the two 4 mm Phillips screws under the HDMI port cover.

### Step 4

- Use a Phillips #00 screwdriver to remove the 5 mm screw near the left hand grip.

## Step 5

- Use a Phillips #00 screwdriver to remove the 5 mm screw near the right hand grip.

## Step 6

- Flip open the LCD.
- Use a Phillips #00 screwdriver to remove the 2 mm screw beneath the LCD assembly.

## Step 7

- Use a Phillips #00 screwdriver to remove the four 6.3 mm screws from the lens mount.

## Step 8

- Remove the lens mount with tweezers.

## Step 9

- Use tweezers to remove the inner metal ring.

## Step 10

- Use tweezers to remove the two springs lying beneath the inner metal ring.

## Step 11

- Use a Phillips #00 screwdriver to remove the three 5 mm screws.

## Step 12

- Remove the two 4 mm Phillips screws.

## Step 13

- Press and hold the lens release button while using tweezers to remove the lens hook.
- Use tweezers to remove the spring underneath the lens hook.

## Step 14

- Use tweezers to remove the metal clip from the external flash mount.

## Step 15

- Use a Phillips #00 screwdriver to remove the four 4 mm screws from the external flash port.

## Step 16

- Remove the second external flash clip with tweezers.

## Step 17

- Remove the external flash port casing to expose five more screws.

## Step 18

- Use a Phillips #00 screwdriver to remove the two 6.4 mm screws.
- Remove the 2 mm Phillips screw.

## Step 19

- Remove the two 3.8 mm Phillips screws from the sides of the external flash connector.

## Step 20

- Gently pull the back case away from the camera.
- ⚠ Do not attempt to remove the back case, as it is attached to the camera by a ribbon cable.

## Step 21

- To remove the ribbon holding the back case to the camera, use the pointed end of a spudger to flip back the top bar on top of the ZIF connector.

## Step 22

- Use tweezers to pull the ribbon out of the connector.
- Remove the back case.

To reassemble your device, follow these instructions in reverse order.
